Subject: Re: Saro Gem Watch

Good morning Thomas

Thank you so much.

Yes I agree with you, never have I seen a pin move.

It came out half way and I noticed it so I pushed it in, the next thing I know the watch nearly fell off my wrist and the pin got lost.

Strange but there we have it.

Thank you for organising a pin - This watch has been on my wrist for nearly 8 years now (the longer by any watch) and it's like loosing my left hand - ha ha ha !!

Please also advise me on a new watch similar to the one I have.

I like the Black one or the all Gold but not sure if they will be as scratch resistant as the one I have.

I also would like to take your advise in which is the best one even if it's none of the ones mentioned.

Please also let me know a price as well and maybe some clearer pictures than there is on the internet.

Again many thanks and ps - I have had Rolex and probably the majority or other known makes in the world but I will never have a different make to a Saro.

I congratulate everyone there for fabulous designs and a great watch and after sales attitude.  
Excellent.....

Best Regards

Tony Evdoka
